

PUBLIC-PRIVATE COOPERATION TARIFF APPLICATION PRINCIPLES

1. In car parks with vehicle identification systems, parking fees are charged according to the entry and exit times shown in the system. In car parks without vehicle identification systems, if the parking permit is not returned at the exit for same-day parking, the full-day parking fee will be charged regardless of the parking time.
2. The monthly subscription is valid for 30 days from the first date of entry without any exits. For monthly subscriptions, in cases of multiple entries/exits, a 25% surcharge is applied to the fee.
3. Vehicle owners who wash their vehicles or throw trash from their vehicles into the car park, will be charged twice the parking fee.
4. Vehicles must leave the car park within 30 minutes of payment, or otherwise will be charged the scheduled fee for the time exceeding 30 minutes.
5. Car park operators can offer free parking or reduced tariffs provided they notify the DHMI.
6. For parking periods exceeding 24 hours, and up to seven days, customers will be charged the full day (12-24 hours) fee as shown in the fee schedule; for the remaining hours, they will be charged a fee calculated by multiplying the hourly fee (divide the full day fee by 24) by the number of hours exceeded.
